React, Python, Django, NestJs, Flutter, VueJs, DotNet, Java

PROFESSIONAL EXPERIENCE

BitChain Pvt. Ltd., Co-Founder & CTO, December 2023 – Present **Gurugram, Haryana**

- MotoMate: Developed and launched MotoMate, a comprehensive vehicle management system and fleet operations product, using Flutter, NestJS, Java Jetty and NodeJS.
- Architected and implemented microservice-based solutions leveraging Azure and Kubernetes, ensuring robust scalability and performance.
- Conducted technical consultations, integrating modern distributor management systems with traditional accounting software like Tally, enhancing operational efficiency.
- Led cross-functional teams to deliver high-quality software products on time, maintaining a strong focus on optimization and cloud infrastructure.

Field Assist, Software Development Engineer - 2, June 2022 – November 2023 **Gurugram, Haryana**

- Developed and maintained enterprise-grade applications using DotNet, VueJS, and NodeJS.
- Utilized Azure and Kubernetes for efficient deployment and scaling of applications.
- Designed and implemented microservice architectures to improve system reliability and performance.

Vistas Global, Flutter Developer (Freelance), January 2022 – June 2022 **Gurugram, Haryana**

- Developing e-commerce and supply chain management applications for businesses and customers for a major retail store in Qatar.
- Ensured high standards of code quality and performance optimization in Flutter-based projects.

Field Assist, Flutter Developer, August 2020 – December 2021 **Gurugram, Haryana**

- Led a team of five developers to build a Modern Trade (MT app) aimed at medium sized FMCG stores in India
- Diagnosed bottlenecks in internal processes and optimized them by automation using GitHub actions, Slack APIs and Asana APIs
- Refactored all internal flutter applications to industry standards and SOLID design pattern for higher stability and speed of development.

Examly (Virtusa training), Software Developer Intern, December 2019 – May 2020 **Vellore, Tamil Nadu**

- Developed a full stack application using Java SpringBoot framework for backend and VueJs for frontend.
- Explored software engineering principles for scalability, containerization and MVC (model-view-controller) design pattern.

Workozy (Flick2Know Technologies), Software Intern, May 2019 – June 2019 **Gurugram, Haryana**

- Developed a web SPG (Single page application) using VueJs framework for data visualization and field user management..

PROJECTS & CERTIFICATIONS

Meta Certified Back-End developer (WIP), 2024

- Meta back-end developer certification focused on industry standard training on full-stack development using the bootstrap, react and django frameworks.

Crypto Gyaan - Flutter Application, 2022

- Developing a flutter app to make useful knowledge about cryptocurrencies more accessible in regional languages.

EDUCATION

Vellore Institute of Technology, School of Computer Science and Engineering **Vellore, Tamil Nadu**

Bachelor of Technology, Computer Science and Engineering, September 2020

Seth Bhagwan Das School, CBSE, Maujpur Chowk, Delhi,

Higher Secondary Certificate, Science and Mathematics, May 2016

St. Mary's Academy, ICSE, Meerut Cantt, Meerut,

Secondary School Leaving Certificate, May 2014
